# COMPLETELY REMANUFACTURED TO A LIKE NEW CONDITION

## The Benefits of Remanufacturing:

Your newly remanufactured lifttruck will be in like new condition, ready to give you like new performance with the same reliability and durability you expect from a Taylor lifttruck.

## The Process:

### 1. Machine arrives at rebuild center:

- Machine is steam cleaned
- Basic inspection & logged into system
- Machine is slotted for start of rebuild process

### 2. Machine is brought into shop:

- Rebuild area is assigned
- Service technician is assigned
- Parts are put on order for rebuild

### 3. Machine is disassembled:

- Parts to be reused are placed on pallets
- Parts to be replaced are scrapped

### 4. Body and Frame Assembly:

- Frame is sand blasted to bare metal
- Frame is inspected for cracks & structural damage
- Repairs are made if needed
- Frame is primed for reassembly
- Frame is returned to rebuild area

### 5. Mast:

- Disassembled & inspected
- Repairs made if needed
- Mast cylinders rebuilt or replaced as needed
- Mast rebuilt
- New rollers, chain, anchors, bushings & pins
- New paint

### 6. Carriage:

- Disassembled & inspected
- Repairs made if needed
- Cylinders rebuilt or replaced as needed
- Carriage rebuilt
- New rollers, bushings & pins
- New paint

### 7. Cab:

- Disassembled
- Rebuilt to new condition
- New wiring, glass, gauges & seat

## What is Remanufacturing?

A process in which equipment is returned to 100% of the Original Equipment Manufacturer's (OEM) Standards. All components are returned to the latest zero hour OEM specifications using our factory quality controlled process in which:

### Key Benefits:

- Substantial Cost Savings
- No New Operator Training Required
- Same Technology & Operation
- Your Existing Parts Inventory is Interchangeable
- Same PM Schedule
- Same Standard Factory Warranty - 1 year or 2000-hrs  
See your dealer representative for more information

- New valves, hose & matting
- Controls rebuilt or replaced as needed

### 8. Drive Axle:

- Disassembled & inspected
- Repair and replace components as needed
- New bearings, seals & brakes

### 9. Steer Axle:

- Disassembled & inspected
- Repair and replace as needed
- New bearings & seals
- Cylinder rebuilt or replaced as needed
- New pins and bushings

### 10. Engine & Transmission:

- Exchange with rebuilt units
- New wiring, hoses, alternator & starter
- New transmission cooler & hoses
- New cooling package
- Fuel system rebuilt

### 11. Hydraulic System:

- All new valves
- All new pumps
- All new hoses
- Tilt cylinders rebuilt or replaced as needed

### 12. Electrical:

- All new wiring.
- All new electrical components

### 13. Reassembly of Machine:

- Complete factory inspection
- New paint & decals

### 14. Prepare for return to customer:

- Final machine operations inspection
- Minimum of a 4 hour run time
- Final customer acceptance inspection (C/A)

# Remanufactured is not “reconditioned or rebuilt” ...

Remanufacturing a product differs from a “reconditioned” or “rebuilt” product, in that, during those processes, typically not all major components or performance parts will be replaced or re-worked to OEM standards. Remanufacturing accomplishes this task by purposely returning every component to its original, if not better than new, condition. **Taylor Remanufactured Lifttrucks** are the highest quality, lowest priced alternative when compared to a new machine. You, the customer, will have peace of mind knowing that your equipment is sustainable with a long operating life. **That’s the real difference.**

7 Cab Electronics & Controls

8 Drive Axle

9 Steer Axle

10 Engine & Transmission
